## **DETAILED ACTION**

## Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-12, 21-25, drawn to a method of communication of data wherein retransmission of a segment received in error is requested only when the segment received in error is not correctable, classified in class 370, subclass 342.
- II. Claims 13-20, drawn to communication of data wherein a forward error correction coded rate is based on a channel condition, classified in class 714, subclass 752.
- 2. The inventions are distinct, each from the other because of the following reasons: The invention in group one is drawn to a method of communication of data including receiving a forward error correction coded block, a forward error correction code rate, and a symbol modulation rate wherein retransmission of a segment received in error is requested only when the segment received in error is not correctable. The invention in group 2 is drawn to communication of data wherein a forward error correction coded rate is based on a channel condition. The inventions have separate utility and require separate searches.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

## Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erika A. Gary whose telephone number is 571-272-

7841. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Appiah can be reached on 571-272-7904. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
